Fitbit user registration for RADAR-base
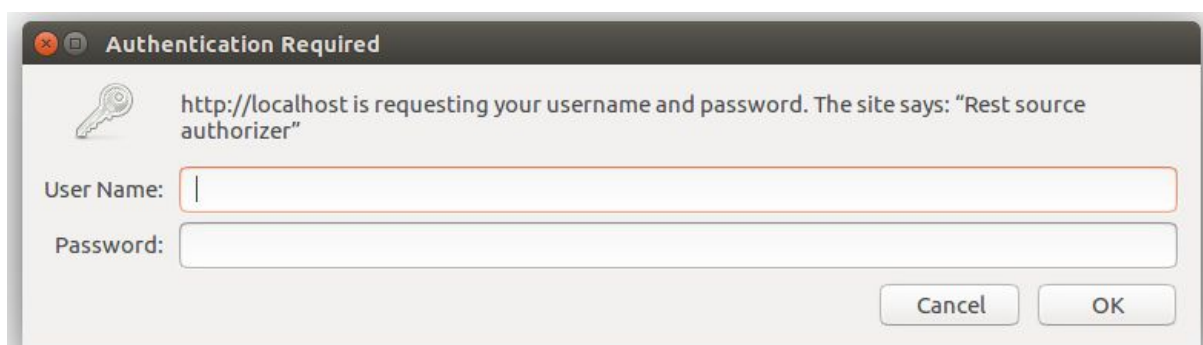

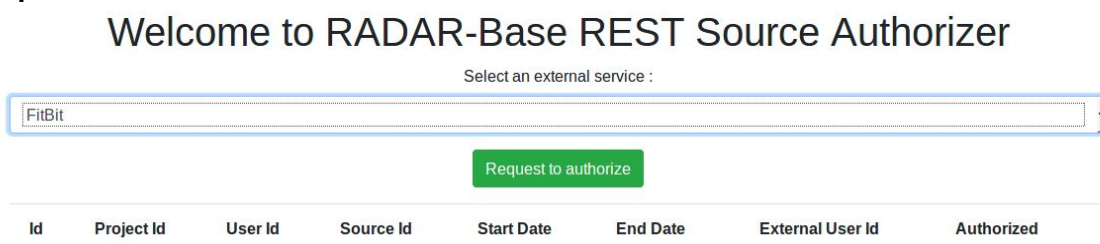

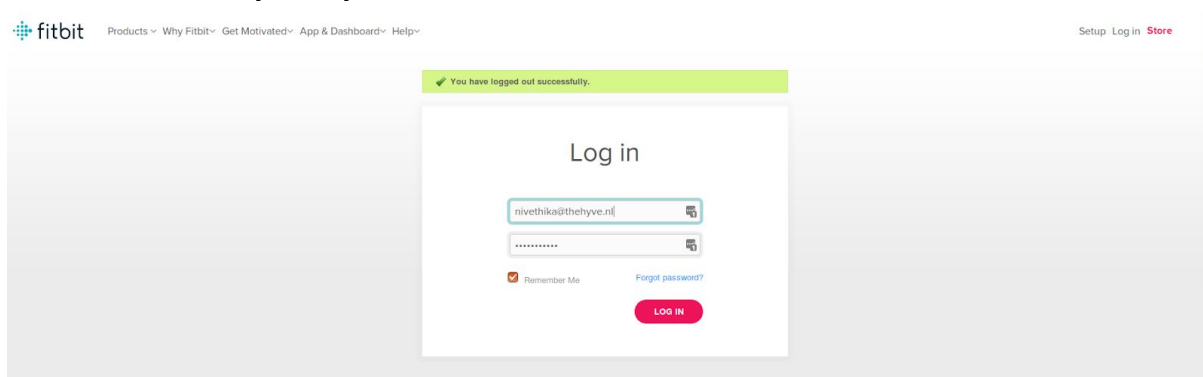

1. Go to `<your-platform-url>/rest-sources/authorizer/` in your browser. You will be prompt to authenticate yourself. Please **enter the credentials given by the system administrator** for "Rest source authorizer".

2. Once you are authenticated, you will see the homepage of the application. Select "**FitBit**" from the drop-down under "Select and external service" and click on "**Request to authorize**".

3. You will be redirected to login to Fitbit page. Please **login** using the **Fitbit account credentials of the participant**.

4. Once successfully logged in the Fitbit user will be requested to authorize radar-base application to collect listed data from their Fitbit account. Please click on "**Allow all**" then "**Allow**".

5. The last step is to add metadata of this radar-base user from ManagementPortal, available at `<your-platform-url>/managementportal/`. (Prerequisite for this step is the creation of a 'Project' for your study and a 'Subject' for this participant in ManagementPortal (MP). See Appendix I).
   a. Fill in the *Project-id from MP* as **Project id** and *Subject-id from MP* as **User-id**.
   b. Use the datepicker to select the **Start date and End date** to specify from which date to which date you want to collect data from this participant.
   c. Finally click on "**Submit**" button.

Reference from MP would look like below.

Projects									
Project Id	Description	Organization	Location	Start Date	Project Status	End Date	Tag	Value	
rate-af-study1	Test project for rate-af		Utrecht		NOT SET				

Subjects

+ Create a new Subject

Subject Id⇕	External Id⇕	Status	Sources	Attributes	Pairing	Actions

Appendix I

1. Create a 'Project' to manage your study in ManagementPortal at `<your-platform-url>/managementportal/`. (For System admin only)
   a. Login as SYSTEM_ADMIN,
   b. Then **Administration -> Projects -> Create a new Project**
      Enter project details (e.g. name of study, selection of wearable devices used in study) and click **Save**.

2. As Project admin and/or System admin: Create a 'Subject' for your participant
3. Go to your project-view (by clicking on Projects-> Project id -> Create a new Subject
4. Enter your local participant id (the participants subject-id in your trial specific database) as the External Id and click on Save.
   a. (Optional) If there is a link that can refer to that participant in another system, enter that link in External Link

5. The created subject will be listed in your project view
